

POST

PRODUCTION

## WEMCO Post-Production Services

- **We provide many services for our customer base.**
- We have an installation crew that is trained to install all sizes of cranes to CMAA standards; we can do anything from a small jib crane installation with foundation to an 80-ton box-girder bridge crane.
- We have a full assembly shop that is outfitted and trained in many process; from hydraulic and hose assembly to electrical control systems.
- We offer a full service and inspection program for overhead cranes and hoists; as well as emergency repair services, available for 24/7 support.
- We offer all types and levels of part inspections for our machine work; anywhere from a simple manual inspection on day to day parts or CMM inspection and reporting on parts with high tolerances or large production runs.
- Vibrating, tumbling, and polishing for post production processing.
